

## The Lee Wiggins Childcare Centre NEW INFORMATION FROM PUBLIC HEALTH

- Recommended that we use Corel cups or glassware for children to drink from.
- PH Strips are available to show bleach solutions correct measurement (once staff has mixed solution). Please note that the strips do not need to be used for each mixture. It is used to make sure the bleach solution has been diluted correctly.
- Individual water bins are used for each child during water play. Water needs to be changed and disinfected before moving on to the next child. See guidelines of water tables usage posted by the sink in the large playroom.
- If food comes from a catering service (Healthy Kids), and the temperature is not over 140C we should discard food. Call Sunita (Owner of Healthy Kids, (905) 882-0200) right away to report. Let the Coordinator know so that we can make alternate arrangements for the children's meal.
- Food Handler's Inspection certificate from Healthy Kids Catering will be provided annually.
